

Which **Kubi** App and Which Tablet Should I Use?

When using Kubi, the first decision you need to make is which app you will use. This depends on a few different factors - which tablet you have, which features you want your video application to have, whether you want to use a particular video service, and what devices the remote participants have.

There are Two Apps you can use for video calling with Kubi, and One App for presentation only.

1. Kubi Video (available iOS only)
This is our integrated app that has video and Kubi controls integrated into one application. Currently this is only available for iPads. Kubi can be called with Kubi Video from a Chrome or Firefox browser on PCs, Macs, or Androids or from another iPad with the Kubi Video app.

2. Kubi Control app (iOS or Android. For Windows, email support@revolverobotics.com) This app provides callers with Kubi Controls in one browser, while in a second window callers run literally any other video conferencing app - Skype, Webex, Gotomeeting, Vidyo, Zoom, Lync, Facetime, Hangouts, etc. On the tablet connected to the Kubi, the Kubi Control app runs in the background while the video app runs in the foreground.

3. Kubi Animate (available iOS only)
This is our presentation app that allows Kubi owners to create quick robotic presentations. Simply download a video on the iPad which will be connected to the Kubi. Then open Kubi Animate, import the video, and play it back while moving the tablet with your hands. Kubi Animate will record the motion, and play it back in synch with the video.

Advanced Video Calling Features
If you are interested in more advanced features such as multi-party video calls, screen sharing, HIPAA Compliance, dial-in lines, recording, etc., then we recommend using the Kubi Control app with the video app of your choice.

Still not sure what to use or want to see an integration with your favorite video app, contact us at: support@revolverobotics.com or at 415-865-0702.

You can download our apps at RevolveRobotics.com/apps

Kubi App and Tablet Compatability

One factor that will determine what app you will use is the tablet that you plan to mount on Kubi. If you have an Android or Windows tablet, then you can only use the Kubi Control App. If you have an iPad, then you can use either Kubi Video, Kubi Control and Kubi animate. For Windows, contact us.

Tablet/App Compatibility Chart

	OS	iPad 3 or later, mini, or Air	iPhone 4S or Later	Android Tablet (Bluetooth 4.0)	Android Phone (Bluetooth 4.0)	Laptop/Desktop				Video Conferencing App Compatibility
						Chrome	Firefox	IE	Safari
